EMPLOYMENT BULLETIN

VOLUME 27 OCTOBER 1981 NUMBER 10

R. I. JOBS INCREASE 4,700 IN SEPTEMBER TO 403,800

Employment in Rhode Island rose seasonally in September, showing gains in both manufacturing and nonmanufacturing industries, and posting the second largest monthly increase in employment this year, according to Mary C. Hackett, Director of the Department of Employment Security.

According to preliminary estimates prepared by the Department of Employment Security, in cooperation with the U. S. Department of Labor's Bureau of Labor Statistics, 403,800 men and women were employed in Rhode Island in mid-September. This represents a monthly increase of 4,700 jobs, and a yearly gain of 1,400 workers.

NONMANUFACTURING

The number of men and women gainfully employed in this State's nonmanufacturing industries rose by 3,400 in September to 276,100, the highest monthly level of the year.

The largest monthly gain was in the Services sector where 1,600 jobs were added to reach a yearly high of 88,400. The return of 1,900 workers in private educational institutions (a normal seasonal pattern) was the largest September addition in this sector, more than enough to offset seasonal losses in Amusement and Recreation facilities.

Employment in the Trades sector increased by 1,000 jobs in mid-September to 81,400. The Retail Trade segment led the increase with gains in Department Stores, Food Stores, Auto Dealers, and Apparel Shops, more than offsetting the seasonal losses in Eating and Drinking Establishments. The Wholesale Trade segment also showed an increase in employment during September.

Transportation and Public Utilities firms gained 600 workers over the month, mostly due to returning

(Continued on Page 4)

EMPLOYERS! NOTE IMPORTANT CHANGES IN TAX CREDIT PROGRAMS

The Omnibus Budget Reconciliation Act of 1981, recently enacted into Federal law, contains provisions which significantly affect the Targeted Jobs Tax Credit (TJTC) program. Since 1979 TJTC has offered employers tax credits as an incentive to hire certain targeted groups of workers. The tax credit can total up to half of the first $6,000 in wages paid to such workers during their first full year on the job and one-quarter of the first $6,000 paid in the second year.

As an employer you cannot claim the tax credit until certification is made that the new worker meets eligibility criteria. And....vouchers must be issued before the potential employee begins work. You cannot claim the tax credit retroactive to the date the worker begins employment. The Federal legislation prohibits retroactive vouchering and certification.

Another targeted group has been added to the TJTC program. Former Public Service employees (PSE) who were paid off from CETA positions in 1981 can make the private employer who re-hires them eligible for the tax credit. The other seven targeted groups are:

- Youth 18 to 24 from economically disadvantagedd families.
- Supplemental Security Income (SSI) recipients.
- Handicapped referred by Vocational Rehabilitation or the VA.
- Vietnam-era veterans who are economically disadvantaged (no maximum age).
- General Assistance recipients (AFDC recipients effective January 1, 1982).
- Youth 16—19 in cooperative education programs.
- Ex-offenders, economically-disadvantaged, within 5 years of conviction or prison release.

As of October 1, 1981 DES is the only agency issuing vouchers for all target groups except youth in cooperative education programs who will continue to be certified by the school.

For more information on the TJTC program, call 277-3726 or contact the nearest office of the R. I. Job Service. To list your TJTC job orders call 277-6950.

* FARMERS; SELF-EMPLOYED; DOMESTIC AND ARMED SERVICES PERSONNEL ARE EXCLUDED.

(Continued from Page 1)

school bus drivers being added to private payrolls. This increase brings the employment level in September to 13,300.

Government payrolls increased by 400 jobs in mid-September, bringing the Government employment level to 58,700. The seasonal gains in returning school employees were partially offset by losses in Municipal government jobs, State government jobs, and Federal payrolls.

A loss of 100 jobs each was recorded in both Contract Construction and Finance, Insurance and Real Estate. The mid-September employment level stands at 13,200 for Contract Construction and 21,100 for Finance, Insurance and Real Estate.

MANUFACTURING

The number of manufacturing jobs in Rhode Island grew by 1,300 to 127,700 in mid-September. The current total represents an increase of 200 jobs over the past year.

Employment in the Durable Goods sector declined by 100 jobs in the month to 55,600 in mid-September, but showed an over the year gain of 200 jobs. Electrical Machinery reported a decline of 200 jobs in the month, bringing its total employment level to 10,900. A decline of 100 jobs in Nonelectrical Machinery was also reported, which brings the total employment in that industry to 8,900. Partially offsetting these losses, however, were gains of 100 jobs each in Primary Metals and Instruments, raising their employment levels to 8,000 and 5,200, respectively.

Nondurable Goods employment grew by 1,400 jobs over the month to a total of 72,100 – standing even with last year's employment level. The monthly gain was led by a seasonal increase in Jewelry/Silverware firms, which posted a 900 worker gain to reach a total employment level of 25,000. General business increases resulted in the addition of 200 jobs in Leather manufacturing, placing its total employment at 3,200. Textiles, Apparel, Rubber Products, and Plastics each reported increases of 100 jobs over the month.

September employment in Food-Beverages, Paper Products, Chemical Products and Miscellaneous Manufacturing remained unchanged from the previous month, while Printing/Publishing employment declined by 100 jobs to a mid-September total of 5,900.

HOURS AND EARNINGS

Average hourly earnings of the State's production and related workers in manufacturing industries rose by 2 cents an hour over the month to $6.17 in mid-September - up 53 cents over last year's hourly rate.

Average weekly hours worked increased by .8 hours over the month to 39.3 - down .6 hours in the yearly comparison. Gross average weekly earnings were $242.48 in September, up $5.70 over the month and an increase of $17.44 over the year.
